Before using your air conditioner, please read this manual carefully and keep it for future reference.
Inside you will find many helpful hints on how to use and maintain your air conditioner properly. Just a little preventive care on your part can save you a great deal of time and money over the life of your air conditioner. You’ll find many answers to common problems in the chart of troubleshooting tips. If you review our chart of Troubleshooting Tips first, you may not need to call for service at all.

Contact the authorised service technician for repair or maintenance of this unit.
Contact the installer for installation of this unit.
The air conditioner is not intended for use by young children or infirm persons without supervision.
Young children should be supervised to ensure that they do not play with the air conditioner.
If the power cord is to be replaced, replacement work should be performed by authorised personnel only.
Installation work must be performed in accordance with the national wiring standards by authorised personnel only.

NOTE: All the illustrations in this manual are for explanation purpose only. Your air conditioner may be slightly different. The actual shape shall prevail.
Safety Precautions

To prevent injury to the user or other people and property damage, the following instructions must be followed. Incorrect operation due to ignoring of instructions may cause harm or damage. The seriousness is classified by the following indications.

| WARNING | This symbol indicates the possibility of death or serious injury. |
| CAUTION | This symbol indicates the possibility of injury or damage to property. |

Meanings of symbols used in this manual are as shown below.

- **Never do this.**
- **Always do this.**

<table>
<thead>
<tr>
<th><strong>WARNING</strong></th>

</tbody>
</table>
When the air filter is to be removed, do not touch the metal parts of the unit. It may cause an injury.

Do not clean the air conditioner with water. Water may enter the unit and degrade the insulation. It may cause an electric shock.

Ventilate the room well when used together with a stove, etc. An oxygen shortage may occur.

When the unit is to be cleaned, switch off, and turn off the circuit breaker. Do not clean unit when power is on as it may cause fire and electric shock, it may cause an injury.

Do not put a pet or house plant where it will be exposed to direct air flow. This could injure the pet or plant.

Do not use for special purposes. Do not use this air conditioner to preserve precision devices, food, pets, plants, and art objects. It may cause deterioration of quality, etc.

Stop operation and close the window in storm or hurricane. Operation with windows opened may cause wetting of indoor and soaking of household furniture.

Hold the plug by the head of the power plug when taking it out. It may cause electric shock and damage.

Turn off the main power switch when not using the unit for a long time. It may cause failure of product or fire.

Do not place obstacles around air-inlets or inside of air-outlet. It may cause failure of appliance or accident.

Ensure that the installation bracket of the outdoor appliance is not damaged due to prolonged exposure. If bracket is damaged, there is concern of damage due to falling of unit.

Always insert the filters securely. Clean filter once every two weeks. Operation without filters may cause failure.

Do not place heavy object on the power cord and ensure that the cord is not compressed. There is danger of fire or electric shock.

Do not drink water drained from air conditioner. It contains contaminants and could make you sick.

Use caution when unpacking and installing. Sharp edges could cause injury. If water enters the unit, turn the unit off at the power outlet and switch off the circuit breaker. Isolate supply by taking the power-plug out and contact a qualified service technician.
### IMPORTANT SAFETY INSTRUCTIONS

**NOTE** For some models, the power supply cord with this air conditioner contains a current detection device designed to reduce the risk of fire. Please refer to the section ‘Operation of Current Device’ for details. In the event that the power supply cord is damaged, it cannot be repaired—it must be replaced with a cord from the Product Manufacturer.

<table>

<tr>
<th>WARNING</th>
<th>For your safety</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.</td>
<td></td>
</tr>
<tr>
<td>- Avoid fire hazard or electric shock. Do not use an extension cord or an adaptor plug. Do not remove any prong from the power cord.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>WARNING</th>
<th>Electrical Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Be sure the electrical service is adequate for the model you have chosen. This information can be found on the serial plate, which is located on the side of the cabinet and behind the grille.</td>
<td></td>
</tr>
<tr>
<td>- Be sure the air conditioner is properly grounded. To minimize shock and fire hazards, proper grounding is important. The power cord is equipped with a three-prong grounding plug for protection against shock hazards.</td>
<td></td>
</tr>
<tr>
<td>- Your air conditioner must be used in a properly grounded wall receptacle. If the wall receptacle you intend to use is not adequately grounded or protected by a time delay fuse or circuit breaker, have a qualified electrician install the proper receptacle.</td>
<td></td>
</tr>
<tr>
<td>- Ensure the receptacle is accessible after the unit installation.</td>
<td></td>
</tr>
<tr>
<td>- Do not run air conditioner without side protective cover in place. This could result in mechanical damage within the air conditioner.</td>
<td></td>
</tr>
</tbody>
</table>

**Do not use an extension cord or an adapter plug.**

---

### Operation of Current Device

*(Applicable to the unit adopts current detection device only)*

The power supply cord contains a current device that senses damage to the power cord. To test your power supply cord do the following:

1. Plug in the Air Conditioner.
2. The power supply cord will have TWO buttons on the plug head. Press the TEST button, you will notice a click as the RESET button pops out.
3. Press the RESET button, again you will notice a click as the button engages.
4. The power supply cord is now supplying electricity to the unit. (On some products this it also indicated by a light on the plug head.)

**NOTES:**

- Do not use this device to turn the unit on or off.
- Always make sure the RESET button is pushed in for correct operation.
- The power supply must be replaced if it fails reset when either the TEST button is pushed, or it cannot be reset. A new one can be obtained from the product manufacturer.
- If power supply cord is damaged, it cannot be repaired. It MUST be replaced by one obtained from the product manufacturer.

**NOTE:** This air conditioner is designed to be operated under condition as follows:

<table>
<thead>
<tr>
<th>Operation</th>
<th>Outdoor temp</th>
<th>Indoor temp</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cooling operation</td>
<td>64-109°F(Tₐ Environment)</td>
<td>63-90°F(Tₐ Environment)</td>
</tr>
<tr>
<td>Heating operation</td>
<td>23-75°F(Tₐ Environment)</td>
<td>19-75°F(Tₐ Environment)</td>
</tr>
</tbody>
</table>

Note: Performance may be reduced outside of these operating temperatures.
NORMAL SOUNDS

High Pitched Chatter
High efficiency compressors may have a high pitched chatter during the cooling cycle.

Vibration
Unit may vibrate and make noise because of poor wall or window construction or incorrect installation.

Pinging or Switching
Droplets of water hitting condenser during normal operation may cause "pinging or switching" sounds.

Sound of Rushing Air
At the front of the unit, you may hear the sound of rushing air being moved by the fan.

Gurgle/Hiss
“Gurgling or hissing" noise may be heard due to refrigerant passing through evaporator during normal operation.

PINGING OR SWITCHING
Droplets of water hitting condenser during normal operation may cause "pinging or switching" sounds.

Before you begin, thoroughly familiarize yourself with the control panel and remote as shown below and all its functions, then follow the symbol for the functions you desire. The unit can be controlled by the unit control alone or with the remote.

AIR CONDITIONER FEATURES

ELECTRONIC CONTROL OPERATING INSTRUCTIONS

Before you begin, thoroughly familiarize yourself with the control panel and remote as shown below and all its functions, then follow the symbol for the functions you desire. The unit can be controlled by the unit control alone or with the remote.

UNIT CONTROL

- ADJUSTS TEMPERATURE OR TIME
- ACTIVATES TIMER
- CHECK FILTER/RESET BUTTON
- SETS MODE
- ENERGY SAVER MODE
- FOLLOW ME INDICATOR (on some models)
- CLEAN AIR MODE (on some models)
- TURNS UNIT ON OR OFF
- SET FAN SPEED
AIR CONDITIONER FEATURES (CONTINUED)

NOTE: The following instructions represent the Unit Controls, the same instructions can be used for the Remote Control.

TO TURN UNIT ON:

DO THIS:
Press the On/Off button.

TO CHANGE TEMPERATURE SETTING:

NOTE:
Press or hold either Left( <) or Right( >) button until the desired temperature is seen on the display. This temperature will be automatically maintained anywhere between 62°F(17°C) and 86°F(30°C). If you want the display to read the actual room temperature, see “To Operate on Fan Only” section.

TO ADJUST FAN SPEEDS:

NOTE:
Used to select the Fan Speed in four steps—Auto, Low, Med or High. Each time the button is pressed, the fan speed mode is shifted. For some models, the fan speed cannot be adjusted under HEAT mode. On Dry mode, the fan speed is controlled at Low automatically.
TO SELECT THE OPERATING MODE:

**DO THIS:** Press the Mode button.

TO USE THE ENERGY SAVER FEATURE:

**DO THIS:** Press the button

SLEEP FEATURE:

**DO THIS:** Press Sleep button

---

**NOTE:**
- To choose operating mode, press the Mode button. Each time you press the button, a mode is selected in a sequence that goes from Auto, Cool, Dry and Fan. The indicator light beside will be illuminated and remained on once the mode is selected.

To operate on Auto feature:
- When you set the air conditioner in AUTO mode, it will automatically select cooling, heating(cooling only models without), or fan only operation depending on what temperature you have selected and the room temperature.
- The air conditioner will control room temperature automatically around the temperature point set by you.
- In this mode, the fan speed cannot be adjusted, it starts automatically at a speed according to the room temperature.

To operate on Fan Only:
- Use this function only when cooling is not desired, such as for room air circulation or to exhaust stale air(on some models). (Remember to open the vent during this function, but keep it closed during cooling for maximum cooling efficiency.) You can choose any fan speed you prefer.
- During this function, the display will show the actual room temperature, not the set temperature as in the cooling mode.
- In Fan only mode, the temperature is not adjusted.

To operate on Dry mode:
- In this mode, the air conditioner will generally operate in the form of a dehumidifier. Since the conditioned space is a closed or sealed area, some degree of cooling will continue.

**NOTE:**
This function is available on COOL mode. The fan will continue to run for 3 minutes after the compressor shuts off. The fan then cycles on for 2 minutes at 10 minute intervals until the room temperature is above the set temperature, at which time the compressor turns back on and Cooling Starts.

**NOTE:**
In this mode the selected temperature will increase by 2°F/1(or 2)°C 30 minutes after the mode is selected. The temperature will then increase by another 2°F/1(or 2)°C after an additional 30 minutes. This new temperature will be maintained for 6 hours before it returns to the originally selected temperature. This ends the Sleep mode and the unit will continue to operate as originally programmed. The Sleep mode program can be cancelled at any time during operation by again pressing the Sleep button.
AIR CONDITIONER FEATURES (CONTINUED)

TIMER: AUTO START/STOP FEATURE:

- When the unit is on or off, first press the Timer button, the TIMER ON indicator light illuminates. It indicates the Auto Start program is initiated.
- When the time of TIMER ON is displayed, press the Timer button again, the TIMER OFF indicator light illuminates. It indicates the Auto Stop program is initiated.
- Press or hold the UP or DOWN button to change the Auto time by 0.5 hour increments, up to 10 hours, then at 1 hour increments up to 24 hours. The control will count down the time remaining until start.
- The selected time will register in 5 seconds, and the system will automatically revert back to display the previous temperature setting or room temperature when the unit is on. (When the unit is off, there is no display.)
- Turning the unit ON or OFF at any time or adjusting the timer setting to 0.0 will cancel the Auto Start/Stop timed program.

CHECK FILTER FEATURE:

- This feature is a reminder to clean the Air Filter for more efficient operation. The LED (light) will illuminate after 250 hours of operation. To reset after cleaning the filter, press the Check Filter button and the light will go off.

CLEAN AIR FEATURE: (on some models)

- Press the Clean Air button, the ion generator is energized and will help to remove pollen and impurities from the air, and trap them in the filter.

DISPLAYS:

- Displays:
  - Shows the set temperature in °C or °F and the Auto-timer settings. While on Fan only mode, it shows the room temperature.

Error codes:

- AS - Room temperature sensor error - Unplug the unit and plug it back in. If error repeats, call for service.
  - NOTE: In Fan only mode, it will display “LO” or “HI”.
- • - Evaporator temperature sensor error - Unplug the unit and plug it back in. If error repeats, call for service.
  - NOTE: “•” is displayed as shown in the left picture.
- HS - Electric heating sensor error - Unplug the unit and plug it back in. If error repeats, call for service.
AIR CONDITIONER FEATURES (CONTINUED)

FOLLOW ME FEATURE:
(on some models)

NOTE:
This feature can be activated from the remote control ONLY. The remote control serves as a remote thermostat allowing for the precise temperature control at its location.
To activate the Follow Me feature, point the remote control towards the unit and press the Follow Me button. The remote display is actual temperature at its location. The remote control will send this signal to the air conditioner every 3 minutes until you press the Follow Me button again. If the unit does not receive the Follow Me signal during any 7 minutes interval, the unit will beep to indicate the Follow Me mode has ended.

ADDITIONAL THINGS YOU SHOULD KNOW

Now that you have mastered the operating procedure, here are more features in your control that you should become familiar with.
- The Cool circuit has an automatic 3 minute time delayed start if the unit is turned off and on quickly. This prevents overheating of the compressor and possible circuit breaker tripping. The fan will continue to run during this time.
- The control is capable of displaying temperature in degrees Fahrenheit or degrees Celsius. To convert from one to the other, press and hold the Left and Right Temp/Timer buttons at the same time, for 3 seconds.

Fresh Air Vent Control (on some models):

The Fresh Air Vent allows the air conditioner to:
1. Recirculate inside air - Vent Closed (See Fig.1)
2. Draw fresh air into the room - Vent Open (see Fig.2)
3. Exchange air from the room and draws fresh air into the room - Vent and Exhaust Open (see Fig.3)
**Air Directional Louvers**

The louvers will allow you to direct the air flow Up or Down (on some models) and Left or Right throughout the room as needed. Pivot horizontal louvers until the desired Up/Down direction is obtained.

Move the Levers from side to side until the desired Left/Right direction is obtained.

**INSTALLATION INSTRUCTIONS**

Your air conditioner is designed to install in standard double hung windows with opening widths of 23 to 36 inches (584mm to 914mm) (See Fig. 1).

Lower sash must open sufficiently to allow a clear vertical opening of following size (see Table 1). Side louvers and the rear of the AC must have clear air space to allow enough airflow through the condenser for heat removal. The rear of the unit must be outdoors, not inside a building or garage.

<table>
<thead>
<tr>
<th>Size</th>
<th>Model 5000~8000Btu/h</th>
<th>10000~12000Btu/h</th>
</tr>
</thead>
<tbody>
<tr>
<td>14&quot; (356mm)</td>
<td></td>
<td>15-1/2&quot; (394mm)</td>
</tr>
</tbody>
</table>

**NOTE:** Save Carton and these Installation Instructions for future reference. The carton is the best way to store unit during winter, or when not in use.

**TOOLS NEEDED:**
- Phillips Screw Driver
- Drill (If pilot holes are needed)

**CAUTION:** When handling unit, be careful to avoid cuts from sharp metal edges and aluminum fins on front and rear coils.

**NOTE:** The top rail hardware and the following Fig.A, Fig.B and Fig.C are not applicable to the units more than 10000Btu/h.

Before installing unit, the top rail must be assembled on the unit (For <10000Btu/h models only).

**Tool Needed:** Phillips Screwdriver

A: Remove the air conditioner from the carton and place on a flat surface.

B: Remove top rail from the rear of the packaging material as shown in Fig. A.

---

**Fig. 1**

INTERIOR WALL

Wooden Windows

Levers

Air Direction

**Mounting Hardware**

3/4" (or 1/2") Lock Frame Screws (7) Sash Lock (1)

**Top Rail Hardware**

3/8" Screws (4) Top Rail (1)

**Carton and these Installation Instructions**
C: Align the hole in the top rail with those in the top of the unit as shown in Fig.B

D: Secure the top rail to the unit with the 3/8” Screws as shown in Fig.C.

**NOTE:** For safety reasons, all four(4) screws **MUST** be securely fastened.

---

**HOW TO INSTALL**

**NOTE:** Top rail and Sliding Panels at each side are offset to provide the proper pitch to the rear (5/16”). This is necessary for proper condensed water utilization and drainage. If you are not using the Side Panels for any reason, this pitch to the rear must be maintained.

1. Place unit on floor, bench or table. Install the accordion filler panels into the left and right wings. Attach the accordion panels to the sides of the unit and then secure (slide) the proper right and left wings into top and bottom rails.

A. Hold the Accordion Panel in one hand and gently pull back the center to free the open end. See Fig.1.

B. Slide the free end (I section) of the panel into the cabinet as shown in Fig. 2A, 2B & 3. Slide the panel down. Be sure to leave enough space to slip the top and bottom of the frame into the rails on the cabinet.
2. Keep a firm grip on the air conditioner, carefully place the unit into the window opening so the bottom of the air conditioner frame is against the window sill (Fig. 5). Carefully close the window behind the top rail of the unit.

3. Extend the side panels out against the window frame (Fig. 6).

4. Place the frame lock between the frame extensions and the window sill as shown (Fig. 7). Drive 3/4" (19mm) or 1/2" (13mm) locking screws through the frame lock and into the sill (Fig. 8). 
   NOTE: To prevent window sill from splitting, drill 1/8" (3mm) pilot holes before driving screws.

C. Once the panel has been installed on the side of the cabinet, make sure it sits securely inside the frame channel by making slight adjustments. Slide the top and bottom ends of the frame into the top and bottom rails of the cabinet. Fig. 4.

D. Slide the panel all the way in and repeat on the other side.

NOTE: If storm window blocks AC, see Fig. 13.
Drive 1 / 2″(13mm) locking screws through frame holes into window sash (Fig.9/10).

To secure lower sash in place, attach right angle sash lock with 3 / 4″(19mm) or 1 / 2″(13mm) screw as shown (Fig.11).

Cut foam seal and insert in the space between the upper and lower sashes (Fig.12).

If AC is Blocked by Storm Window

Add wood as shown in Fig.13, or remove storm window before air conditioner is installed.

If Storm Window Frame must remain, be sure the drain holes or slots are not caulked or painted shut. Accumulated Rain Water or Condensation must be allowed to drain out.

Removing AC From Window

- Turn AC off, and disconnect power cord.
- Remove sash seal from between windows, and unscrew safety lock.
- Remove screws installed through frame and frame lock.
- Close (slide) side panels into frame.
- Keeping a firm grip on air conditioner, raise sash and carefully “rock” air conditioner backward to drain any condensate water in base of unit. Be carefully not to spill any remaining water while lifting unit from window. Store parts WITH air conditioner.
CARE AND CLEANING

Air Filter Cleaning

The air filter should be checked at least once a month to see if cleaning is necessary. Trapped particles in the filter can build up and cause an accumulation of frost on the cooling coils.

- Push the vent handle to the Vent Closed position (where applicable).
- Open the front panel.
- Grasp the filter by the center and pull up and out.
- Wash the filter using liquid dishwashing detergent and warm water. Rinse filter thoroughly.
- Gently shake excess water from the filter. Be sure the filter is thoroughly dry before replacing.
- Or, instead of washing you may vacuum the filter clean.

Note: Never use hot water over 40 °C (104°F) to clean the air filter. Never attempt to operate the unit without the air filter.

Cabinet Cleaning

- Be sure to unplug the air conditioner to prevent shock or fire hazard. The cabinet and front may be dusted with an oil-free cloth or washed with a cloth dampened in a solution of warm water and mild liquid dishwashing detergent. Rinse thoroughly and wipe dry.
- Never use harsh cleaners, wax or polish on the cabinet front.
- Be sure to wring excess water from the cloth before wiping around the controls. Excess water in or around the controls may cause damage to the air conditioner.
- Plug in air conditioner.

Winter Storage

If you plan to store the air conditioner during the winter, remove it carefully from the window according to the installation instructions. Cover it with plastic or return it to the original carton.
## TROUBLESHOOTING TIPS

Before calling for service, review this list. It may save you time and expense. This list includes common occurrences that are not the result of defective workmanship or materials in this appliance.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Air conditioner does not start</td>
<td>Wall plug disconnected. Push plug firmly into wall outlet.</td>
</tr>
<tr>
<td></td>
<td>House fuse blown or circuit breaker tripped. Replace fuse with time delay type or reset circuit breaker.</td>
</tr>
<tr>
<td></td>
<td>Plug Current Device Tripped. Press the RESET button.</td>
</tr>
<tr>
<td></td>
<td>Control is OFF. Turn Control ON and set to desired setting.</td>
</tr>
<tr>
<td>Air from unit does not feel cold enough</td>
<td>Room temperature below 17°C(62°F). Cooling may not occur until room temperature rises above 17°C(62°F).</td>
</tr>
<tr>
<td></td>
<td>Temperature sensing element touching cold coil, located behind air filter. Straighten tube away from coil.</td>
</tr>
<tr>
<td></td>
<td>Reset to a Lower temperature.</td>
</tr>
<tr>
<td></td>
<td>Compressor shut-off by changing modes. Wait approximately 3 minutes and listen for compressor to restart when set in the COOL mode.</td>
</tr>
<tr>
<td>Air conditioner cooling, but room is too warm- ice forming on cooling coil behind decorative front.</td>
<td>Outdoor temperature below 18°C(64°F). To defrost the coil, set FAN ONLY mode.</td>
</tr>
<tr>
<td></td>
<td>Air filter may be dirty. Clean filter. Refer to Care and Cleaning section. To defrost, set to FAN ONLY mode.</td>
</tr>
<tr>
<td></td>
<td>Thermostat set too cold for night-time cooling. To defrost the coil, set to FAN ONLY mode. Then, set temperature to a Higher setting.</td>
</tr>
<tr>
<td>Air conditioner cooling, but room is too warm- NO ice forming on cooling coil behind decorative front.</td>
